

Paraskevi Ioannidi

Email: ioannidi@louisiana.edu

College & Department: Ray P. Authement College of Sciences, School of Geosciences

Research interests/project:

Future project starting Fall 2025: Using analogue materials (e.g., sand, syrup, silicone) to model how lithospheric plates move and deform. I will be testing materials and initial conditions, so there is a lot of freedom in choosing the geological setting and processes.
